

Websites that turn visitors into customers.

Asteway Melese, full stack developer and UI/UX designer. I design, build and launch fast, reliable web apps, from the screen your customers see to the database behind it.

About me

I turn messy requirements into products that feel obvious to use.

My design background means I think about the user before I write a line of code. My full stack work means I build the interface and the API and database behind it, and I care just as much about speed, security and maintainable code. I start by finding the real user problem, build the smallest working version, then measure and improve it.

I work well in small teams, write clear pull requests, and ask early when a requirement is fuzzy.

Technical strength

Complete features from UI to API to database, with fast, accessible results.

Problem solving

Reproduce, isolate, fix, then add a test so it stays fixed.

Soft skills

Clear communication, design feedback, quick learner.

Skills & tech stack

The tools I use most, grouped by where they sit in a product.

Frontend

Backend

HTML5 CSS3 JavaScript

TypeScript React Next.js

Tailwind CSS Figma

Python Machine Learning

Node.js Express REST APIs

PostgreSQL MongoDB Firebase

Tools & DevOps

Git GitHub Actions Vite

Vercel Docker Jest

Playwright

Featured projects

Each one started with a real problem. Here is what happened.

ShopLite

A fast storefront for small local businesses.

Situation A local shop's site took 6 seconds to load on mobile and lost carts.

Task Rebuild the storefront for speed and easier checkout.

Action Moved to Next.js, lazy-loaded images, simplified checkout to 2 steps.

Result Load time down 58%. Checkout completion up 31%.

Next.js TypeScript Stripe Tailwind

Live demo GitHub

TaskFlow

A kanban board that works offline.

Situation Field teams lost task updates when their connection dropped.

Task Build a task manager that never loses data.

Action Added local-first storage with background sync and conflict handling.

Result Zero lost updates across 200+ beta users.

React IndexedDB Node.js PostgreSQL

Live demo GitHub

DataLens

A clear analytics dashboard for non-technical users.

Situation Managers found the existing reports confusing and rarely opened them.

Task Redesign the dashboard around the three questions managers ask most.

Action Ran 8 user interviews, prototyped in Figma, built with accessible charts.

Result Weekly active use up 2.4x. Support tickets down 35%.

React D3 Figma Jest

Live demo GitHub

Text Adventure Game

A playable story game with branching choices, built as a standalone Windows

program.

Situation I wanted to practise core programming logic through a project I could finish and play.

Task Build a complete adventure game where the player's choices change the story.

Action Wrote the story paths, input handling and game state, then packaged it as a single .exe.

Result A finished game anyone can run on Windows with no install.

Console app Game logic Windows

Experience

Most recent first.

Full Stack Developer, Brightwave Studio

2025 – Present

- Cut page load time by **42%** across the front end and API.
- Shipped **12** client features with zero critical bugs after release.
- Raised accessibility score from **71** to **96** across the main product.

Web Developer, Northpoint Digital

2024 – 2025

- Built **20+** responsive pages from Figma designs.
- Raised unit test coverage from **30%** to **75%**.
- Mentored **2** interns on Git workflow and code review.

Freelance UI/UX Designer

2022 – 2024

- Delivered designs for **10** small businesses and startups.
- Lifted one client's sign-up conversion by **27%** with a simpler onboarding flow.

Certificates
